## WILLWEMAKE SACRIFICES FOR SURVIVAL AND PROSPERITY?

If we are going to be ready for survival and prosperity, we have to make communication infrastructure available to the poorest 25% of the world.

That involves sacrifice on the part of the government, corporations, philanthropic visionaries, investors and communities for the sake of the people.

Free Wi-Fi and usage can b

of generations cannot be reversed by talking or arguing is to death, or accusing

The good news is this: Our inefficiencies educationally relationally, financially and in business and government are exactly the measure of our opportunity for a better future

communities?

If 25% or more of our youth, future for 100% of us is deeply

With 80 million new citizens of earth each year, a new German or Egypt or Philippines born every single year, we must have answers for the challenges of density, food, water,

nand-ups and hand-outs. Feed still hungry. Help him acquire a fishing pole and bait, and learn to use it, he'll feed himself, his

How can we, together pole into the hands of every human on earth, to build the future for us all?

This is the gift of a future and a hope for everyone who will care and try, and cannot be held back by disadvantage

Every Community, if we set them free, has 5% of the future innovators and leaders and educators and shepherds of relationships and opportunities. We can give the most disadvantaged 25% who "have no fishing pole" a chance for a future. This will then be a platform for solutions instead of a crisis of need, and its resulting issues of health and crime and

## HOW CAN WE DO THIS?

It's a risk, and it will cost something of everyone. But the cost of doing nothing and self-advancement is far higher, as the wise and forward-looking must realize

What is the cost to invest in and thereby protect our

Those in Government will need to commit to 10% or more of their efforts and resources invested selflessly and with vision for others and for life 20 years after they are out of office. True, it will not guarantee short term gain or popularity. But, it is a sacred trust of office, nonetheless. The poorest 25% need free Gigabit Wi-Fi to build a future, if they will have the courage to try. Let's help them get a fishing pole.

Those in the Corporate world, the utilities and communication companies in particular, will need to set aside short-term profit motives and call their stakeholders to do the same, for the greater good. Facilitating access to the Internet Backbone in an intelligent fair way to help the disadvantaged -- this shouldn't

Communities and those investors and philanthropists with prosperous lives and successes can make the opportunities and financial and verbal sacrifice required to make this gift happen, while there is still

has there even existed a gift that could be a platform for every man, woman, and child to advance themselves. For thousands of years, education and opportunity have always defeated the tyranny of bondage and servitude. Now all can be set

free, at last.

Today, for the first time in human history, the gift of free Gigabit Wi-Fi for the most disadvantaged 25% who cannot do this for themselves and their families, can change the future for all of us.

If everyone -- government corporation, investor, philanthropist visionary, and community -- will contribute towards this very specific goal, rather than war against it for personal or corporate gain, it can be accomplished worldwide in less than a decade.
